DETAILED ACTION

(1)

Status of Claims

Claims 1-15 remain for examination wherein claim 1 is amended.

(2)

Claim Rejections - 35 USC § 103

The rejection of Claims 1- 15 under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,093,497 to Wiemann et al., in view of CA 2,154,818 to Stefan et al., as generally set forth in the first office action mailed 11/21/2006 stands.

The text of those sections of title 35 US Code not included in this action can be found in the prior Office Action.

(3)

Response to Arguments

Applicant's arguments filed 02/21/2007 have been fully considered but they are not persuasive. Therefore, the grounds of rejection for claims 1-15 as indicated in the first Office Action stand.

First, the applicant argues that the pigment paste of amended independent claim 1 requires that it be free of binders and grinding resin. In response, the Examiner respectfully submits that Wiemann et al. disclose that their coating composition may utilize binders. Therefore, the use of binder is optional as explained in the grounds of rejection above. Furthermore, the pigment composition of Wiemann et al. is formed as a stand-alone composition followed by dispersion in the acrylate polymer binder. Thus,

the pre-dispersed pigment concentrate would read upon the composition set forth in applicant claim 1.

Second, the applicant argues that the terpolymeric anionic polyacrylate used in Bergfried's composition renders it non-combinable with Wiemann et al. In response, the Examiner respectfully submits Bergfried was utilized for the specific teachings of his surfactant additives. Furthermore, in response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Third, the applicant argues Wiemann et al. failed to disclose the amount of pigment in the composition. In response, the Examiner respectfully submits that Wiemann et al. disclose that the pigment amount is preferred in a range of 5-25%(claim 8).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1755

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
